# Client case study

## CASE STUDY

IT company with 60,000 employees worldwide.

## ANALYZE

Large claim experience was largely driven by neonatal claimants – multiple births, complex pregnancies, etc. Several of these claimants exceeded $1M.

## GOALS

- Help infertile couples achieve healthy pregnancies
- Support pregnant women through education and early risk identification
- Support families needing NICU resources

## SOLUTIONS

Integrated Women’s Health programs — working together to achieve results

- **Fertility**
- **Maternity**
- **Neonatal**

## RESULTS

- C-section rates have decreased by **33%**
- NICU average length of stay decreased by **58%**
- 26% fewer multiple births
